

# Formulate 10' Four Sided Tower

## COL-02-BL

Mix and match the Formulate® line of towers to add architecture and drama to any event or interior space. Rectangular-shaped towers come in 12ft, 10ft and 8ft heights and 3ft square at the top and bottom. They combine the latest developments in fabric printed technology with aluminum tube frames to add dimension, decor and sculpture to any event, stage set, tradeshow booth or interior space. Formulate towers accommodate internal LED lighting to create a glowing effect.

# Kit Assembly

## Step by Step

### Step 1.

Gather the components to build Section 1 of the tower frame. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Methods 2 for more details.

### Step 2.

Gather the components to build Section 2 of the tower frame. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method 3 and 4 for more details.

### Step 3.

Gather the components to build Section 3 of the tower frame. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Methods 2 and 3 for more details.

### Step 4.

Lay the three sections flat on floor. Combine them to complete the tower frame assembly. Use the Exploded View and the Labeling Diagram for part labels.

Reference Connection Method 1 for more details.

# Lighting

## Step 5.

Gather the components to connect lighting to the frame.

Connect the lighting components to the frame as shown.

Components hang from top center tube of the frame and the power cable runs down and out of the bottom as shown in RED

Note that additional extension cords (Not Included) will be needed to extend the length of the power cords as needed.

# Graphic

## Step 6.

Pull graphic over top of assembled frame with lights.

Zip graphic down corner edge, and attach graphic to bottom perimeter velcro that is along the edge of the horizontal base tubes.

Bottom perimeter velcro noted in red.

Pull Graphic Down over assembled Frame

Completed assembled tower with graphic

# Connection Methods

**Connection Method 1: SNAP BUTTONS**

Snap button connections are simple and easy to use. First, locate the snap button on the connector or swage tube. Second, locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the hole. To disassemble, press the snap button and carefully pull them apart.

**Connection Method 2: TC-30-3W-R**

Snap button connections are simple and easy to use. First, locate the snap button on the connector or swage tube. Second, locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the hole. To disassemble, press the snap button and carefully pull them apart.

**Connection Method 3: COL-02-T3/COL-02-T5/COL-02-T6**

Snap button connections are simple and easy to use. First, locate the snap button on the connector or swage tube. Second, locate the hole on the corresponding tube. Press the snap button with your thumb and slide the tube and connector together so that the snap button snaps fully into the hole. To disassemble, press the snap button and carefully pull them apart.

**Connection Method 4: TC-30-X**

First, connect spreader tubes (COL-T3) to TC-30-X. Second, once the X frame is assembled, connect side tubes (COL-T6).
